

# VUE 3 TypeScript

## defineProps soporta typescript

components/Props.vue

```
<script setup lang="ts">

const props = defineProps<{
  limite: number;
  alertaLimiteMensajes?: string;
}>()
</script>
```

Soporta Types

Type: String

## defineProps interface

components/Props.vue

```
<script setup lang="ts">

interface Props {
  limite: number;
  alertaLimiteMensajes?: string;
}

const props = defineProps<Props>()
</script>
```

interface

Type: interface

## defineEmits soporta typescript

components/Emit.vue

```
<script setup lang="ts">

const emit = defineEmits<{
  (event: 'incrementar', num: number): void;
  (event: 'reiniciarContador'): void;
  // nombre del evento, Payload/carga
}>()
</script>
```

Type: directo
